

Proceedings of the Farm Livelihoods quarterly progress review of 2017-18 and planning of 2018-19 held at Mumbai, Maharashtra from 15th to 18th May, 2018

The farm livelihoods quarterly progress review meeting for the financial year 2017-18 and planning for FY 2018-19 was held at Mumbai, Maharashtra from 15th to 18th May 2018. The meeting was chaired by the Joint Secretary, Government of India. SPM-Livelihoods/Livelihood team members of Eighteen States / UTs, NRLM – NSO (PRADAN, CSB & Digital Green), the World Bank team and representative from Clean Energy Access Network have attended the meeting. SMD, Chhattisgarh SRLM and SMD of Maharashtra SRLM have also participated in the event. List of participants is attached as Annexure. Followings are the details on the presentation made by the States/ UTs, discussion and key decision points.

A. Important common action points discussed during the meeting

1. All the SRLMs must focus on Farm Livelihoods interventions in all the intensive Blocks in next two years.
2. Dedicated farm Livelihoods staff must be deployed by all the states at Block level and State level as per the advisory shared by MoRD. (Livelihoods implementation advisory – 11062/01/2015/NRLM dated 29/12/2015)
3. It has been observed that, progress of the MKSP projects are slow in many states. States must expedite physical and financial progress of the MKSP projects.
4. Mahila Kisan and LH CRP data need to be uploaded in the livelihoods MIS on priority by all the states/UTs.
5. One of the objectives of MKSP by NGO partners was to identify and roll out best practices so that SRLM can replicate it at scale. So now all the SRLM should take up the best practices of existing MKSP projects and replicate those in large scale.
6. Organic farming need to be taken up by all the states. The planned work should be initiated in all the designated organic clusters.
7. State missions should start engaging with Regional Councils to access support in rolling out organic farming. SRLMs may take field level support from the RCs.
8. Depending on the context at least 3-4 organic clusters may be planned in one intervened blocks rather than planning Organic Cluster too thin in multiple blocks.
9. States may prepare new MKSP AAP proposal and submit for approval. MKSP AAP on Organic Farming may be prepared and submitted.
10. SRLMs may prepare MKSP proposal in partnership with RCs on organic farming.
11. Continuous engagement (training and handholding) with the CRPs is required for successful roll out of the livelihood projects. CRPs must receive at least 40-50 days of training in 3 years' time.
12. All the state missions must ensure that CRP trainings are module based trainings by the SRPs.
13. Communities may be provided exposure visit to the various agriculture tools and machineries. While deciding the tools for CHCs, the demand should be generated from the community based on their needs.
14. States must take very calculative step while partnering with private companies especially which are into chemical fertilizer and pesticides business. DAY-NRLM's non-negotiables must be conserved.
15. States must focus to promote existing successful livelihoods practices instead of introducing completely new practice for the community.
16. States must keep close observation of the Artificial Insemination practices promoted by all the partners and regular monitoring need to be done. Indigenous breeds should be promoted by the NRLM projects as per the guidelines of National Livestock Mission.
17. Rural haats may be planned and set up in existing haat areas rather than setting up haats in new areas.
18. States must share the prepared evaluation studies, reports, knowledge products with NMMU team.

19. SHG members should have direct membership of Farmer Producers Company. PG is only an intermediary body and cannot be members of the FPC.
20. CHCs may incorporate solar portable pumps wherever water pumps are required.
21. From this year onwards MPR indicators on farm livelihoods under SRLM-AAP has been incorporated in NRLM-MIS. SRLMS have to enter the monthly progress on the same.
22. The target on farm livelihoods submitted by States in the quarterly target data sheet under SRLM-AAP 2018-19 will be considered as the target under SRLM-AAP for farm livelihoods interventions.
23. *All funds under dedicated funds for livelihoods projects under NRLP needs to be exhausted by 30th June, 2018. If the state feels it cannot expend the available funds for the project, it may utilize it for other NRLP activities as per instructions already issued in this regard. Any funds remaining unutilized as on 30th June will have to be refunded to MoRD.*

B. Farm Livelihoods Outreach under MKSP till March, 2018 (as presented by SRLMs):

Sr.	State / UT	No. of projects	District		Block		Villages		Households	
			Target	Achievement	Target	Achievement	Target	Achievement	Target	Achievement
1	Andhra Pradesh	14	15	15	423	427	8652	9699	1069400	1301107

Total			203.12	122.82	80.27	75.41	52.755	

F. State wise discussion and comments:

Tamil Nadu:

- DPR need to be submitted for the sanctioned MKSP AAP (second) immediately.
- Dedicated approved staff for the MKSP AAP project need to be taken on board immediately.
- Proposed organic clusters may overlap existing MKSP areas. In this context state need to revisit the target of organic clusters.
- As shared by TN team, TNSRLM is facing problem to open bank account for the Producer Groups. They may take Joint Liability Group (JLG) model like many other states and explore the account opening option in conversation with respective banks.
- State should plan 3-4 organic clusters in one block in a concentrated mode rather than planning these organic clusters too thin. This strategy need to be relooked.
- Rural haat planning for 18-19 data need to be re-checked.

West Bengal:

- Ginger value chain is a good initiative taken up by WBSRLM. They have followed the proper process of selection for CRPs. Module for CRP selection may to be shared with NMMU for reference of other states and NMMU as well.
- State mission may not take up interventions which are exact replication of the work of different govt. schemes/ line departments.
- WBSRLM need to plan and established more Custom Hiring Centers and CHCs may be established at VO level rather than Sangha.
- Block or administrative demarcation should not be criteria to set up Producer Companies. Rather market, scale, commodity etc need to be prioritized while selecting are of PC.
- Tasar MKSP AAP project must be rolled out immediately. DPR is also to be submitted immediately.
- Pashu Sakhi must be incorporated in both the MKSP tasar projects.
- State may not intervene in Artificial Insemination activities. Relevant department may take this activity.
- Pico projector may be kept with Krishi Sakhi rather than in CHC, otherwise lack of responsibility, may cause damage of the same.
- Regional councils of NCOF, Agriculture universities need to be taken on board for organic farming. Identification of proper resource persons/ domain experts need to be done for different livelihoods interventions with due diligence as inappropriate resource selection may create issue to sustain NRLM non-negotiable.
- State may share ToR for LH staff recruitment with NMMU and SRLM need to follow the eligibility criteria shared by MoRD while selecting LH staffs.
- As presented, Producer Societies have been promoted. This strategy need to be re-looked and what is the role of Producer society? Setting up of PG and PC should be focused only. Producer Enterprise guidelines shared by MoRD need to be followed. State need to share the document prepared for PC with MoRD.
- Rural Haat in convergence with MGNREGA data need to be re-checked.
- SRLM has taken up a good initiative to create small videos on livelihood interventions and CMSA intervention. These videos may be shared with NMMU.

Andhra Pradesh:

- AP has not followed the shared standard PPT template shared by NMMU. AP team need to share the review PPT in standard template with NMMU.
- Lot of data discrepancy have been found in the presented PPT. All the shared data need to be re-checked, corrected and then shared.

- SERP AP must submit all the documents for next installments of MKSP.
- SERP need to monitor MKSP NGO partners' project and submit report with NMMU.

Uttar Pradesh:

- Dedicated approved staff for the MKSP AAP need to be taken on board immediately to expedite the project and to ensure quality of project implementation.
- UP must take up LH asset creation in convergence with MGNREGA. Farm pond, rural haat etc must be planned and implemented in large scale.
- Expenditure of the MKSP AAP in not in sync with the number of Mahila Kishan identified. Fund expenditure is also less and needs to be expedited. All the proposed intervention of the project need to be implemented in time bound manner.

Haryana:

- Progress of the MKSP AAP has been very slow from the initial stage. State must take immediate step to expedite [physical and financial progress and ensure quality of intervention.
- SRLM presented that, HSRLM is planning to expand the project size (MK and block) of the already sanctioned MKSP AAP. This need to be submitted through official letter and only after approval of MoRD, it may be taken up.
- In case expansion of the project is proposed, state must ensure that all the expected key outputs of the MKSP project are achieved.
- There is severe human resource shortage for implementation of livelihoods projects including approved MKSP AAP in which dedicated approved staff was approved. Dedicated approved staff for MKSP AAP need to be taken on board immediately to expedite the project and to ensure quality of project implementation.

Uttarakhand:

- There is no dedicated farm livelihoods staff in the state. State must ensure recruitments of dedicated LH staff at Block and State urgently.
- Once SRLM takes staff on board, NMMU may provide NRP and technical support for proposal preparation and roll out.
- SRLM needs to identify the area of intervention in organic farming in state context and should not replicate the work taken up by other govt. departments.

Gujarat:

- There is hardly any progress in farm livelihoods theme by GLPC in last few years. No one is there to anchor LH team in the state for long time. This is a huge concern area for GLPC.
- HR must be taken on board immediately. No fund will further be released till state take HR on board.
- State must report the progress of the MKSP NGO projects. The project seemingly has been mismanaged for a long period of time. A MKSP project sanctioned by EC cannot be changed by the State as per their convenience. State must officially inform MoRD before terminating a project that has been sanctioned by EC. State have to also officially update the status of the MKSP project to MoRD and resolve the issue of the MKSP project of the NGO partners. This is a serious concern and need to be resolved very carefully.
- Organic cluster data need to be uploaded in the MIS.

Andaman & Nicobar:

- State need to identify the specific LH intervention in the UT area.
- State can start working on MKSP proposal preparation and need to submit it by September. NMMU will provide required support for LH intervention if state ask for it officially.

Madhya Pradesh:

- MP is planning for community run soil testing lab. There must be an organized process to interpret the soil testing report and it should be understood by the end users. Required organic inputs need to be prescribed along with the report to the MKS.
- Senior CRPs should not be considered as SRPs. Instead senior CRPs may be engaged as PRP or senior CRP.
- State must engage SRPs optimally and strategically with proper planning to train such huge number of CRPs to train. Each CRPs should receive at least 10-15 days training in a year.
- MP is planning to set up CHC of 15 Lakh budget. There must be a business model and strategy to run such expensive set up. Dedicated expert need to be engaged to run such CHC. Due diligence need to be done while CHCs are set up.
- State need to share the Business plans with NMMU for all the planned PCs. If required NMMU may engage NRPs to work on the Business plan.
- MP must complete the recruitment of dedicated LH staff under SRLM AAP quickly.
- Approved staffs of MKSP AAP are not yet placed. LH staffs must be placed immediately.
- SRLMs need to share these mentioned items of MKSP PIA projects with NMMU: Third party evaluation report, videos prepared, IEC material shared, Training materials.
- MP may explore the scope of Producer Company for turmeric.

Chhattisgarh:

- CGSRLM may explore the scope and area for intervention in Lac and Tasar.
- State should fix work/target plan for the TSA staffs who are working in the state for value chain project. The progress of work need to be monitored regularly.
- State need to explore the competitive market price for all the NTFP produces before entering in collaboration with any agency.
- State need to explore the legality of registration of the CLF which have been engaged in marketing of their produces online.

Odisha:

- State need to critically look into the facts that many partners may promote hybrid and chemical fertilizer. So SRLMs need to ensure due diligence before any collaboration. NRLMs non-negotiables need to be followed.
- Planned coverage of Kitchen garden is nominal compared to total MK covered in the state. Kitchen Garden should be planned in large scale and may be adopted by at least 70-80 % covered MKs.
- OLM may prepare a MKSP AAP on Organic Farming with support of Regional Councils.
- There is shortage of Block level dedicated staff in livelihoods theme in the state. SRLM need to take farm LH staffs on board immediately.

- MIS data need to be uploaded in the DAY-NRLM farm LH MIS.
- State to share the SRP engagement policy with NMMU.
- Village list for the organic cluster need to be shared immediately with NMMU.
- State need to share training calendar with NMMU.
- SRLM has done a good work in preparation of recommended organic inputs as per soil testing report. State need to share the recommendation documents of soil testing report with NMMU (English translation).

Bihar:

- State need to expedite the physical and financial progress of the Value Chain project.
- There is no dedicated staff for MKSP project at block level. It is one of the major reason of slow progress of the MKSP project. Dedicated staff for Livelihoods need to be deployed on priority.
- State need to share the knowledge products to NMMU prepared by the state.

Jharkhand:

- Pashu sakhi must be included in the NTFP projects.
- State must look into the critical issues of purchase and distribution of livestock with due diligence.
- SRLM has come up with an innovative app that can be used through an android phone for data entry of Pashu sakhi /Krishi sakhi

Maharashtra:

- Larger percentage of MKs should be adopting kitchen garden. A concrete roll out plan need to be prepared.
- Expenditure through PCs under value chain projects need to be completed by 1st week of June.
- Progress of the tasar project of BAIF is extremely slow. MSRLM should pay special attention to expedite the project implementation.
- Pending dedicated staffs for farm livelihoods need to be taken on board immediately for both MKSP AAP and SRLM AAP. Block and District LH staffs need to be well trained on farm livelihoods.

Rajasthan:

- CHCs have not been planned under SRLM AAP of 18-19. SRLM need to relook the plan and establishment of CHCs at village level.
- Planned coverage of Kitchen garden is nominal compared to total MK covered in the state. Kitchen Garden should be planned in large scale and may be adopted by at least 70-80 % covered MKs.
- Out of 35 planned dedicated farm LH staff for MKSP AAP, only 15 are in place presently. Remaining staffs must be taken on board immediately on priority.
- State must ensure that MKSP partners and SRLM do not promote chemical fertilizer and pesticide.
- State need to explore how existing data from state MIS can be ported to DAY-NRLM farm livelihoods MIS.
- State to send audited UC for second installment of MKSP AAP to MoRD.

Kerala

- Reports on MKSP projects for Attapady and COMPT have not been submitted. State must monitor these projects and submit updates to NMMU.
- No report has submitted by Kudumbshree on MKSP – AAP projects. State need to submit it at the earliest.
- State may put special request for recommendation to MoRD for allowing construction of individual as well as community assets under MGNREGA in the State.
- Value chain development centers under TRIFED collaboration – State to plan it under Attapady project.
- State to complete the CRP profile data in the livelihoods MIS

Telangana:

- For millet processing, state team may explore the old and existing machineries and scope for expansion.
- As state is planning to look into legal part while entering in to preparation of Trichoderma.
- State may not create new PIA in this changed scenario. Keeping existing PIA as nodal PIA divide it into newly formed mandals under the same geography.
- State to share the required data for Organic Cluster.
- State may prepare one MKSP AAP proposal immediately for few Blocks under Organic Farming with partners.

Jammu & Kashmir:

- J & K is yet to start the roll out of the MKSP project. State need to initiate the program immediately.
- Block level dedicated LH staffs need to be taken on board immediately for MKSP project.

World Bank Comment:

Progress in farm livelihoods theme have been impressive. Few areas more focus may be provided:

- Technology involvement for data collection form the field and information dissemination
- More in depth analysis of the value chain interventions may be done.
- More climate resilient agriculture practices may be introduced under farm livelihoods interventions.
- Self-sustainability of the promoted producer enterprises.

MIS:

- Telangana and AP need to upload the data in the NRLM livelihoods MIS. They may engage people for data entry in a time bound manner.
- Bihar informed that state will complete the remaining data entry by 5th June, 2018.
- CGs to complete the CRP data entry in the MIS.
- Kerala need to complete remaining 1 Lakh data entry and CRP data entry immediately.

- Maharashtra to complete data entry of 1.4 Lakh MK.
- Odisha is yet to start data entry for Medicinal plant and Tasar project. State must initiate and complete the data uploading.

NSO Pradan:

- PRADAN with support of NMMU will develop a Comprehensive Village Livelihoods plan and implementation tool and then will put the tool in practice. Tool development is the immediate need and the tool would help to design the holistic intervention comprising agriculture, livestock and NTFP. It could also include Non-farm interventions. This is an action research kind of project.
- NSO PRADAN will prepare the comprehensive village livelihoods implementation tool with the help of SRLM teams.

CLEAN Energy:

- Clean Energy would share a documents of compilation of cases and models.
- **Suggestions from states:**
 - Bihar: Storage of 'Nira' during the day time
 - JH: Dal processing unit, dryer
 - Jh: Tasar reeling machine scope, CSB, TDF may discuss
 - Jh: Turmeric dehumidifying machine
 - UK: Clean cooking in remote villagers
 - Solar storage at milk collection centers
- Clean energy team will visit to Jharkhand and Odisha to explore the possible opportunities and models.

State requested for support from NMMU:

- Hindi translation of the Modules, flip-charts of SRP and CRP training on agriculture and Livestock need to be shared with the states.
- MIS training to be done in Odisha.
- States need support strategise rolling out of Organic Clusters.
